### Home Improvement Tips

---

The new year has arrived and now we're not making a gift list but a "to do" list. Should I paint this year, put on a new roof, fence or landscape the yard, or an even bigger project such as a room addition or major remodel.

Before you start, stop and do some thinking, researching, and planning. Start with a realistic budget, because we all want the best we can afford. Next, find out what the best products and services for your project are. Visit your local showrooms, home shows, and hardware stores. See what you like. Ask questions. Get an idea of prices and qualities. Check out recommendations, and product reviews online.

Now before you call a contractor or start a project yourself, consider a realistic timeframe in which you can or must complete the work. There are almost always unforeseen or "un-see-able" things that will come up. A good rule of thumb - it will take twice as long as you think it will.
